How to unlock my samsung phone forgot pattern. Forgot my pattern lock how to unlock.

To make it easier for its users to locate, lock, or erase their devices remotely, Google has developed a dedicated feature of the Android Device Manager. It is also commonly known as "Find My Device" as it is mostly used to locate a lost (or stolen) device. Though, you can use this feature to ring your device, lock it, unlock it, or erase it remotely. You can access it from anywhere by providing your Google credentials and resolving the forgot pattern Android problem. All of this can be done by following these steps: Step 1. Launch a web browser of any device and go to the Android Device Manager website by clicking right here: . Step 2. You need to provide your Google credentials to sign in. Remember, this should be the same Google account that is linked to your device. Step 3. After signing in, select the target Android device. Step 4. You will get the location of the device with several other options (lock, erase, and ring). Step 5. Click on the "Lock" button to reset its password. Step 6. It will open a new pop-up window. From here, you can provide the new password for your device. Step 7. After confirming your password, you can also provide an optional recovery message and phone number (if your device has been lost or stolen). Step 8. Save your changes and sign out of your account from Android Device Manager. This will automatically reset the old pattern on your device to the new password. Step 1. Open the internet browser on your Laptop, computer or another phone or tablet and input the following website address: . click on the Sign in button and input your login credentials of your Samsung account, then click on Sign in button once more. Step 2. The mobile device registered under your Samsung account will appear on the right-side of the screen. If you have multiple devices registered under the same Samsung account, make sure you select the device that needs to be remotely unlocked. Refer to the image below and click on the Unlock icon to unlock your device. Step 3. Once you click on Unlock, a pop-up window will appear asking to verify the password of your Samsung account. After you input your password, click on the NEXT button, the pop-up window will automatically close and another pop-up window will appear with the result of remotely unlocking your device. Note: To Use Samsung Find my mobile services: Mobile device must be turned on. Mobile device must be connected to Wi-Fi or mobile network. Your Samsung account must be registered on your mobile device and have the Remote unlock option enabled. You can find out more about Find My Mobile here. If you are experiencing difficulties with your Samsung mobile, tablet, or wearables, you can send us a question in the Samsung Members app. Find out more about sending an error report. by Sophie Green Updated on 2022-07-21 / Update for Unlock AndroidThe pattern lock in Android phones is provided to secure devices and help the owners get access to their device easily and quickly. But sometimes, people get locked out of their device due to forgotten pattern lock. If you are also putting up queries like "I forgot my android pattern" or "how to unlock android phone pattern lock if forgotten" on the internet, then you can stop browsing other websites. In this article, we explore 5 effective methods you can take to unlock Android forgot pattern lock. Read on and choose which method works best for you when you forgot unlock pattern on Android device. The first and most reliable method to unlock Android forgot pattern lock is using Tenorshare Android Password Reset Tool - Tenorshare 4uKey for Android. As one of the best Android pattern unlocker software, it helps in removing the pattern lock on Android devices in minutes. It can also unlock PIN, password, or fingerprint lock on Android devices and help Samsung users bypass Google account with just one-click. The key features of 4uKey for Android are listed below: Unlock Android forgot pattern lock, password, screen lock PIN, and fingerprint Bypass Google Account on Samsung without Password Intuitive user interface and safe unlocking process Auto System Detection before Unlocking Android Work with all Android operating systems including Android 11/12 Here is how to unlock Android phone pattern lock if forgotten, with the help of Tenorshare 4uKey for Android. Download and install the software and launch it when it is ready. Connect your phone with your computer and wait for the phone to be detected by the tool. Choose Remove Screen Lock feature from the interface. Select the first option - Remove Screen Lock for most Android devices and then click on the Start button to initiate the pattern removal process. The software will prepare the data environment and send the package to the phone. Next, 4uKey for Android will give a pop-up notifying that password removal will erase the device data. Click on the Yes button. Finally, follow the on-screen process and the software will remove the forgotten pattern lock from your Android device. As you try to unlock the Android forgot pattern with Tenorshare 4uKey for Android, you will see how easy it is. You can further restore the device data from Google backup. Pros: The process is easy and clear to follow. It is available for removing forgot pattern lock on device running Android 2 to Android 12. It also supports bypassing Samsung Google account verification after reset. Cons: It will erase data on Android devices. It currently does not work on Sony, OnePlus and Oppo devices. Removing Android forgot pattern lock without losing data is possible as long as you are using the early Samsung device. Check out the video below to learn how to unlock pattern lock without losing data. When you forgot pattern lock, there is a security feature you can rely on to unlock the forgotten pattern lock, that is, Android Device Manager or Google Find My Device. This method works for all android devices as long as you have previously logged into the Google Account on your devices, and can remotely erase the data and settings from the phone. The reset will bypass the pattern lock and help you regain access to the device. Visit the official Google Find My Device page and log in with your Google credentials. As you enter the interface, you will see the devices linked to your Google account and their location on the map. Click on the ERASE DEVICE option on the left side panel and you will be prompted to enter your password to erase the device. Again click on "Erase." This will reset the device and the Android forgot pattern lock will also be removed. Pros: The service can be used for all devices. Cons: It is useful unless Find My Device is enable on the phone. It requires internet connection and active phone. It works for Android 4.0 and above. If you prefer knowing how to unlock android phone pattern lock without Gmail ID, then you can use the Find My Mobile service with the Samsung account on your phone. But this service is only available for the Samsung device users. Visit the official website for Samsung Find My Mobile service. You will have to log in with the Samsung account to enter the interface. After you log in, you will see the Unlock option on the right side panel. Click on the option. From the pop-up window, click on "Unlock" and enter your Samsung account password to unlock it. Pros: This method is very helpful for Samsung users. It only takes a few minutes to unlock the device. Cons: This service is only available for Samsung users. The prerequisite is that you have enabled remote unlock. Some Android devices running on Android 4.4 and earlier versions comes with an inbuilt forgot pattern feature. This allows the users to simply unlock the device by using their Google ID and password. Below are the steps you need to follow to unlock Android forgot pattern lock. When you've entered the wrong passcode for 5 times, the "forgot pattern" option will appear on the screen. Tap on it. Click on it and you will be navigated to another screen to choose whether you want to use the security question or Google account to unlock the device. Choose the Enter Google account details and enter the details. You will be prompted to reset the pattern. As you finish setting up the new pattern lock, you will easily get access to your device with the new pattern. Pros: This method is quick and easy. Cons: It won't work if the device doesn't have an active internet connection. This way of unlocking Android pattern only works for phones running Android 4.4 or lower. Another method that you can try if you forgot pattern lock of Android device is to factory reset your device. This will entirely restore the device to its original condition when you bought it, but you will lose all the data stored on the device. That said, here's how to unlock forgot pattern lock on Android by performing a factory reset. When your phone is powered off, press and hold the Power and Volume Down buttons simultaneously, then press and hold the Power key until the phone enters into the Recovery mode. You can use the Volume up and down button to navigate through the option and press the Power button to select the Wipe data/factory reset option. Now select "Yes" or "Factory data reset"(depending your phone model) to perform the reset. Once the reset is finished, you can reboot your device and there will be no lock pattern on the screen. Pros: The process is very effective to remove the pattern lock. Cons: It is complicated and different for different brands. If you forgot screen lock pattern of your phone, then don't be panic and try any of the above-mentioned solutions. All of these methods proved to be effective for unlocking Android forgot pattern lock. But if you find some of the methods complicated, then Tenorshare 4uKey for Android, a great Android Pattern Lock Unlocker is always at your rescue. It is a simple, safe, and reliable method to unlock your device as quickly as possible.
